**Inoculate Legumes.**

The Department of Bacteriology of the University of Idaho is now about to enter upon its third year in supplying dependable cultures for the inoculation of seed previous to sowing. This time has been required to determine the minimum price at which these cultures could be furnished. The department has concluded, from this experience, that it can supply such cultures delivered, at the nominal cost to the purchaser, of ten cents per acre.

**Soldier Sarcasm.**

The cavalry instructor was lecturing severely a particularly wooden-headed recruit.  
"How many times have I got to tell you," he asked, "never to approach horses from the rear without speaking to them? One of these days they will be kicking you on the head, and then we will have a lot of lame horses on our hands!"—*Tit-Bits*.

**Excused.**

"Are you aware," asked the landlady, "that your room rent is three weeks overdue?"  
"I'm awfully sorry," said the man who occupied the third floor hall room, "but the gaslight in my room is so dim that I haven't been able to read those little reminders you're been slipping under my door."

**Road Bonds Urged to Build Permanent Highways**

Salem—A state bond issue for making permanent road improvements and an increased tax levy to provide for maintaining state highways and for redemption of the bond issue, are recommended by E. I. Cantine, chief deputy engineer, in his annual report submitted to the State Highway commission. Construction of a coastal beach highway from Astoria to Crescent City is also urged.

When the locating parties have completed their work in Douglas, Wasco and Sherman counties, Engineer Cantine announces that the Columbia Highway will be located from Seaside, in Clatsop county, as far as Wasco, in Sherman county, and the Pacific Highway will have been surveyed from Portland to the California line, with the exception of a section in Josephine county.

"It is believed that the date is rapidly approaching when the state will have to undertake the maintenance of the main trunk highway, such as the Columbia and Pacific highways," writes Mr. Cantine. At the present time the State Highway commission does not hold itself responsible for the upkeep of roads constructed from state funds, leaving this duty to county officials.

The report urges upon the commission the advisability of working for enactment of legislation authorizing it to lay out highways and procure rights of way for them, and empowering the commission to arrange with the counties for the maintenance of such state laid-out roads until a state maintenance program is adopted.

Expenditure of the highway department from January 1 to December 1, 1915, totaled \$223,128.81, according to the report. Of this amount \$58,443.48 was expended on the Columbia Highway in Columbia county, and \$15,702.97 on the Rainier Hill section of the highway. The sum of \$34,106.70 was expended on the Columbia Highway in Clatsop county. The Mitchell's Point construction of the Columbia Highway cost \$41,896.36.

**Railroad Work Moves Forward in Harney County**

Ontario—In spite of the severe weather, work continues on the O.-W. R. & N. extension west from Riverside, Or., to points in Harney county. Nearly all the grading has been completed as far as Oakley and the rock cuts and bridges are now progressing rapidly. Mail service to Riverside has been begun, the mail run on the three-a-week train being from Ontario to Riverside.

Between Bend and Burns the Strahorn surveying party is in the field, running the newly-projected line between those interior points. H. N. Bogue, chief engineer for the Strahorn party, was in Burns last week and hired a saddle horse for the purpose of a closer investigation of the Sage Hen pass. Leaving the horse, he proceeded by auto to Bend, so it is not known whether this pass will be used by the new line, but probabilities are that it will.

Everything indicates that within a few months work will actually be under way to connect Burns finally with the outer world, and to do away with "Interior" Oregon forever.

**Klamath Ships Livestock.**  
Klamath Falls—One of the largest shipments of livestock from Klamath county this year left on the Livestock Special this week. This comprised 25 carloads for California and Portland markets. The biggest shipment was of lambs sent to San Francisco by O. T. McKendree, of this city. There were over 2000 head, filling 20 cars. Two cars of cattle and one car of hogs were shipped by Fred Stukel to Sacramento. Charles Horton consigned two cars of cattle to the Union Stockyards at Portland.

**Klamath Indians Logging.**  
Klamath Falls—Logging operations on the Klamath Indian reservation for the winter are well under way, according to Supervisor of Reservation Forests J. M. Bedford, under whose direction the work is being done. The government camp is on Wood river, north of Klamath agency. About 1,000,000 feet of timber already has been decked ready for hauling to Wood river. It will be driven down Wood river and towed across Upper Klamath lake for use by the Klamath Manufacturing company, a large box factory.

**Heavy Timber Felled by Storm.**  
Molalla—One of the severest storms known in this section for years has done heavy damage to standing timber. A tract known as the Schusted claim, which cruised 12,000,000 feet, is reported by Fred Schafer, a sawmill man who was hunting cougars in that vicinity, to have lost at least 5,000,000 feet of timber, which was blown down. In many places the trees are piled 20 feet high.

**Power Plant Destroyed.**  
La Grande—When fire Wednesday burned the Mill Creek power plant, which assists in generating electricity for the Eastern Oregon Light & Power company, the city became hard pressed for power juice. All big consumers were promptly shut off until temporary repairs can be made.

**Hard Work.**  
A visitor was being shown through the editorial rooms of a great newspaper.  
"Is that the man who writes those profound editorials on affairs of state?" he asked, pointing to a man whose corrugated brow indicated deep thought.  
"Oh, no," replied the guide. "That's the baseball editor trying to think up a new rumor about the Federal league."—*Philadelphia Public Ledger*.

**Hereditary Pains.**  
An anecdote of a little boy watching a flock of sheep on the screen is told.  
"Aunt Mollie, what's those things?" "Sheep," his aunt replied. "Sheep's wool is what your pants are made of."  
"Huh! No, they're not," Willie snorted. "Mamma made my pants out of Charlie's old ones."—*Philadelphia Public Ledger*.

**His Snarl.**  
"Yes, I take a cold bath every morning."  
"Yah!"  
"You seem to doubt my statement."  
"My dear sir, if every man took a cold bath every morning who talks about taking a cold bath every morning, my business would be doubled."  
"What is your business?"  
"The soap business."—*Louisville Courier-Journal*.

**Competition.**  
The editor handed the manuscript back after hastily scrutinizing the sheets, and said in a lofty manner: "We don't print any such stuff as that."  
"Well, you needn't be so haughty about it," retorted the spasmodic contributor. "You're not the only one who won't print it."—*Illustrated Sunday Magazine*.

**What to Do for Itching Skins**

Eczema, ringworm and other itching, burning skin eruptions are so easily made worse by improper treatment, that one has to be very careful. There is one method, however, that you need not hesitate to use, even on a baby's tender skin—that is, the resinol treatment. Resinol is the prescription of a Baltimore doctor, put up in the form of resinol ointment and resinol soap. This proved so remarkably successful, that thousands of other physicians have prescribed it constantly for over twenty years.

Resinol usually stops itching instantly, healing the eruption quickly, unless it is due to some serious internal disorder. Resinol Ointment and Resinol Soap can be bought at any druggist's, and are not at all expensive. Write for free sample, Dept. 6-S, Resinol, Baltimore, Md.

**Fruit Business Makes Big Gain.**

Puyallup—The bookkeepers of the Puyallup & Sumner Fruit Growers' association are completing the annual inventory of the business, from which will be made the regular report to the members and stockholders at the annual meeting in February. While the figures have not yet been given out, expect the amount of products handled by the association during the last year, it is stated on reliable authority that the total business for 1915 will amount to at least a third of a million dollars more than in 1914. The 1914 business was approximately \$1,250,000. Last year's increase was more than 25 per cent.

Dairymen of the valley are planning to organize a cow testing association. Prof. E. O. Gibson, of the State college, will take a leading part in the work as soon as he can find time from his other duties as dairy instructor at the winter school. A committee consisting of W. J. Langdon, C. L. Boss, Adolph Loncke, J. A. Shrengst and Dr. F. B. Gault is doing the necessary advance work among the dairymen.

It is roughly estimated by experts that one-third of the cows in Pierce county are "boarders," that is, the milk does not pay for their feed and upkeep. The testers' association teaches the dairymen how to find these cows so they can dispose of them and get better ones in their places. It will also advise the members as to the best kinds of feed.

**More Orders for Oregon Hops.**

Portland—The hop market is firmer, with a broad and healthy demand. Orders are more plentiful than at any time since the year opened. The Hubbard & Jones lot of 204 bales at Independence was bought by McClellan at 10 and 11 cents.

S. T. Edmiston, of Sherwood, has started a movement for the formation of an association or bureau of growers, the object of which is to collect information, independent of the dealers, as to the exact quantity of hops grown in the state. He believes the growers are seriously handicapped by the lack of such information, and thinks that a properly organized body can obtain the data accurately. It is his intention to take the first steps toward organization in this section.

**Cattle in Grant County Die.**  
Wenatchee, Wash.—A great deal of stock is reported as dying in the southern part of Grant county from starvation and exposure in the worst storm that has visited that section in years. The temperature dropped to 10 degrees below zero on several nights, and this with a driving snow and wind, made it severe for the stock, which has been accustomed to winter out. G. L. Manderville returned from a trip almost to the Frenchman Hills, getting his stock, and reports that he found several head belonging to others dead on the way.

**Military Training at University.**

University of Oregon, Eugene.—Military training at the University of Oregon is under consideration in a committee of the board of regents. Requests have come from many sources that instruction in military tactics be provided. P. L. Campbell, president of the University, suggests however that State University preparedness work take the form not of the usual regimental drill but of technical military instruction, such as engineering knowledge, which is always at a premium in warfare; also in bringing the students to a maximum of physical fitness. He suggests "a minimum of formal military drill of the old kind."

**Mastodon Bones at University.**

University of Washington, Seattle.—Bones which are reputed to be those of a mastodon, unearthed at Stratford, near Wilson Creek in eastern Washington, are to be studied by scientists at the University of Washington. Curator Frank Hall, of the state museum on the campus, was notified of the discovery and has asked that the bones which were found be sent to the university for examination. Later Earl L. Packard, of the geology faculty, will visit the beds to superintend further excavations.

**When It Came to That.**

A cockney angler, thinking his Highland boatman was not treating him with the respect due his station, expostulated thus:  
"Look here, my good man, you don't seem to grasp who I am. Do you know that my family has been entitled to bear arms for the last 200 years?"  
"Hoots! That's nothing," was the reply. "My ancestors have been titled to bare legs for the last 2,000 years!"
